Fiscal Year 2023 Annual Audit Plan

Background

The Internal Audit Division is an independent, objective assurance, and consulting body established within the Department of Family and Protective Services (DFPS). Internal Audit plans, develops, and performs internal audit activities, including assurance services, and consulting engagements, also referred to as non-audit services.

The Commissioner and Executive Management Team participate in the development of an annual risk assessment and audit plan that best and most effectively addresses issues of control, risk management, and governance of the agency. The audit plan may include services designed to address one or more of the following areas:

- Achievement of the organization's strategic objectives
- Reliability and integrity of financial and operational information
- Effectiveness and efficiency of operations and programs
- Safeguarding of assets
- Compliance with laws, regulations, policies, procedures, and contracts

DFPS internal auditing activities are conducted in accordance with the Institute of Internal Auditor's *International Standards for the Professional Practice of Internal Auditing*, Government Accountability Office *Generally Accepted Government Auditing Standards (GAGAS)*, and the Institute of Internal Auditor's Code of Ethics.

Audit Projects in Progress

In addition to audits planned for fiscal year (FY) 2023, the Annual Audit Plan (AAP) includes three audit projects and five consulting engagements in progress as of August 31, 2022. See Table 1 on the following page and Table 4 in Consulting Services section.

Audit Plan Areas

The Annual Audit Plan identifies planned audit projects, consulting engagements and other management consulting functions for FY 2023. See Table 2 on the following pages and Tables 5 and 6 in Consulting Services section. The AAP also includes other areas Internal Audit has planned a formal review and has allocated direct audit hours for those projects. See Table 3 on the following pages.

²Total consulting services hours based on 6 consultants and 1 consulting manager, minus hours designated for internal development and process improvement; figure rounded to nearest hundred.

Audit Plan Revisions

The FY 2023 Annual Audit Plan can be revised as needed to adjust for emerging issues and resource availability. Deviations from the audit plan must be documented and significant deviations approved by the Commissioner. If a change is made to the annual audit plan, a copy of the amended plan must be submitted to oversight agencies during Internal Audit’s annual reporting process.

Risk Areas Not Included in the Plan

Additional risk areas were identified in the risk assessment process and could be added to the annual audit plan as projects are completed and resources become available (see Table 8 below). Alternately, management could take steps to review controls in these areas.

Table 8: FY 2023 Risk Areas Not Included in the Plan

Risk Area	Potential Objectives	Agency Strategic Plan
Technology Lifecycle Management	To determine that the agency maintains reliable technology to support agency objectives, with appropriate strategic plans to retire obsolete systems and implement replacements.	Goal 3 Agency Operations

Risk Assessment Methodology

In July 2022, an agency-wide risk assessment survey was sent to all employees to submit input for the purposes of assessing risks on agency activities and its functions for the risk assessment process.

The Internal Audit Division interviewed Executive Management and division leadership from June to July 2022, to discuss potential risk issues for their respective divisions and gain their perspective on the agency's areas of highest risk. The results from these communications and the risk factors below were used by Internal Audit when identifying activities and functions to include in the annual audit plan:

- Governance and Culture
- Strategy and Objective Setting
- Performance
- Risk and Revision
- Information, Communication, and Reporting
- Executive Management Input and Other Considerations

Auditing standards require the Chief Audit Officer to communicate periodically to senior management on significant risk exposures, control issues, corporate governance issues, and other matters as appropriate. By communicating these high-risk areas, management has the opportunity to review and assess operations to mitigate risk. The audit plan is one of the mechanisms used to communicate risk exposures.
